SUMMARY

Frontend-focused AI developer with 2+ years of experience building scalable web applications using Next.js, TypeScript, and Python. Experienced in developing data-driven solutions, automated workflows, and interactive dashboards. Combines technical expertise with analytical and financial insight to deliver efficient, user-centric applications.

EXPERIENCE

Frontend Developer | Webfoundr - Remote

Jul 2025 - May 2026

Fishersville, Virginia, USA

- Built responsive, high-performance web interfaces using Next.js and Tailwind CSS, improving performance by up to 55%
- Integrated REST APIs with Axios and managed server state using RTK Query with optimized caching, reducing redundant API calls by 40%
- Improved application performance by minimizing unnecessary re-renders and optimizing data flow, enhancing dashboard responsiveness
- Collaborated in a cross-functional team of 8 members to deliver scalable features ahead of schedule, consistently meeting early delivery timelines

Full Stack Developer | Cryptofleet - Hybrid

Jan 2024 - May 2025

Dubai - UAE

- Built and maintained MERN stack web applications, improving overall system performance by ~30–40% through frontend and backend optimizations
- Developed REST API integrations and delivered new features in live production environments, ensuring stable and efficient data flow
- Optimized application performance and resolved critical frontend/backend issues, improving system stability and reducing inefficiencies by ~25–30%
- Developed scalable, reusable components and code structures within a 4-member cross-functional team, improving code quality and accelerating engineering workflows

EDUCATION

Virtual University

May 2026 - Dec 2029

Bachelor's in Software Engineering

SKILLS

JavaScript • TypeScript • React • Node.js • Python • SQL • Git • Docker • REST APIs • GraphQL • Next.js • ReactJS
• Tailwind CSS • Ant Design • Redux • Axios • FastAPI • Figma

WORKSHOPS AND TECHNICAL TALKS

• Folio3 AI Workshop (University of Karachi, Mar 2025):

Gained foundational, hands-on experience in core AI concepts and practical applications.

• NASTP Freelancer Baithak (May 2025):

Attended expert talks on the intersection of AI technology, business development, and freelancing strategies.

• GDG I/O Extended '25 (NASTP, Jul 2025):

Participated in workshops on Google's Gemma open models and the Model Context Protocol (MCP) for AI agent development.

CERTIFICATIONS

Certified AI, Metaverse, and Web 3.0 Developer and Solopreneur - Giaic	May 2026
MERN Stack Developer - SMIT	Jan 2025

PROJECTS

Physical AI Humanoid Robotics Course Book

DocuSaurus, Railway, FastAPI, MySQL and Python

<https://robotics-book-ecru.vercel.app/>

Authored a robotics-focused full-stack application integrating an AI chatbot, multilingual translation, and authentication system to enhance interactive learning and user accessibility.

Secure data vault

Python, Streamlit and Cryptography

<https://secure-data-vault-miraejk.streamlit.app/>

Built a secure data vault using Python, Streamlit, and Cryptography to enable end-to-end encryption and decryption of sensitive data via an intuitive interface.

Staking Crypto Wallet

Next.js, Tailwind CSS, state management, TypeScript

<https://staking-wallet.vercel.app/>

Staking wallet for crypto exchange, can perform CRUD operations add stake to redeem it.

Bayt - al - Hikma Library Manager

Python, Streamlit, SQLite, SQLAlchemy

<https://bayt-al-hikma-project-javeriakamran.streamlit.app/>

Built a library management system enabling full CRUD operations with integrated analytics to track trends and categorize data based on book genres.
